

1 Before your first shift

1 Redeem your launch code

More → Account → Enter launch code, then unlock your free Pro access.

2 Start a shift, every time you drive

Tap “Start Shift” on Home before you begin. This is the single most important habit in the app.

3 End your shift and log it properly

Tap “End Shift” and enter your earnings, platform, and jobs completed accurately.

WHY THIS MATTERS

Driverr can only learn your real earning patterns when you log every shift. That data powers your personal heatmap, tax estimates and daily insights.

2 Tolls

Log your Congestion Charge as a payment reminder and manage your TfL account directly from the app.

Why: Stay compliant and avoid penalty charges.

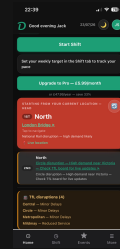

3 Events · Pro

City-matched local events and surge context, so you know what is happening nearby before it becomes obvious.

Why: Be there before the surge, not after. Use Get Directions to route straight there.

4 Every feature, what it does, and why it helps

Direction Intelligence

WHAT

Ranks where to head using live TfL disruption + rail status, updated every 15 min.

WHY

Stop guessing; drive toward genuine demand.

Note: Tap Navigate for Google Maps, Waze or Apple Maps.

Earnings Heatmap · Pro

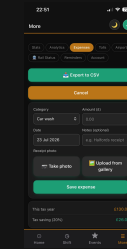

WHAT

Shows your best hours and days from your own shift data—not generic averages.

WHY

Spot your patterns, not someone else's.

Expense Logger · Pro

WHAT

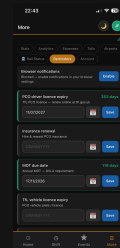

Log fuel, car wash, insurance and more. Photograph and store receipts securely.

WHY

Every logged expense can reduce your tax bill.

Note: Export CSV with receipt links, ready for your accountant.

Tax Tracker & Reminders

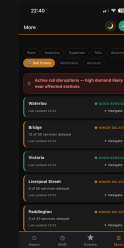

WHAT

Estimates tax band and amount owed. PCO, MOT, insurance and TfL licence alerts.

WHY

Avoid surprise tax bills and missed renewals.

Rail Status

WHAT

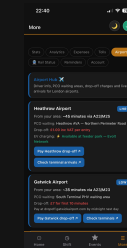

Live disruption data for major London terminals.

WHY

Know before your passenger does.

Note: Currently London only—other cities coming soon.

Airport Hub

WHAT

Drop-off charges and live arrivals for Heathrow, Gatwick, Stansted and London City.

WHY

One less tab open on your phone.
